

JOINT RESOURCE MANAGEMENT COURSE

Faculty of Resource Management

College of Defence Management

edm

Genesis

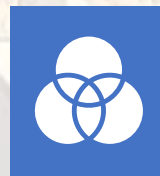

A need was felt for imparting management skills to officers of all the three services in a joint environment. Accordingly a decision was taken during the Joint Operations Logistics Committee meeting held at HQ IDS on 23 Jan 08 to conduct a Joint Logistics Capsule Course (JLCC) at CDM. Since the course focusses on promoting jointmanship and ensuring effective management of scarce resources in a tri-service environment, the course was renamed as Joint Resource Management Course (JRMC) in 2014. It is a two weeks course conducted once every year.

Aim

To familiarise participants with tools, techniques, policies, rules, regulations and other relevant aspects of resource management in a *Joint Services Environment*.

Course Objectives

To promote application of modern management concepts and techniques to achieve operational effectiveness.

To develop expertise in matters related to management of resources, and 'jointmanship'.

To promote ability to analyse issues related to resource management to generate viable options for the organisations.

Empower participants to advise Commanders on matters related to resource management based on scientific decision making tools.

To promote peer learning and adopt best practices prevalent in sister services.

To understand best and contemporary practices in Supply Chain Management.

To understand procurement procedures.

To familiarise with Joint Logistics Support structures.
